

This extra-heavy-duty rotavator performs excellently in demanding conditions and is ideal for “built-on” combinations - such as Ripper, Furrower or Crumble Roller.

Side drive through heavy-duty Roller Chain - 17 ton breaking load - with externally adjustable tensioning skid. Rotor drive is supported by large ball bearings and face seals.

Protection of tractor and transmission against shock-loads ensured by heavy-duty safety clutch.

Cultivating depth is adjustable - raising/lowering the side skids.

Depth control wheels available as optional.

Selectatilt pick-off gears allow four alternative rotor speeds (540 PTO)
